

CODE RED ATTACKS

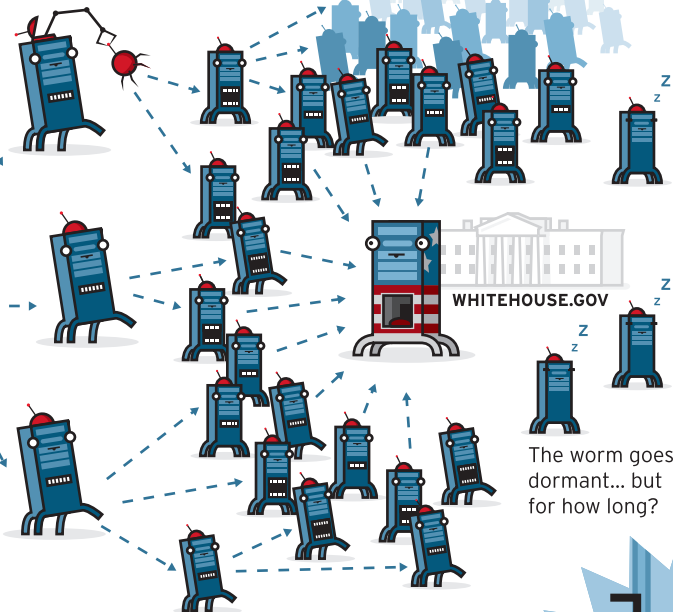

A malicious hacker sends the Code Red worm onto the Internet to find a vulnerable host server.

Day 1

The worm propagates to other vulnerable servers, turning them into "zombies" which infect other servers. This process continues exponentially until...

Day 1-18

Code Red ceases to proliferate and the numerous "zombie" servers turn to attack the White House website, attempting to overwhelm its server with junk communications.

Day 19-27

The worm goes dormant... but for how long?

Day 28-31...
